

With the company Oznaka d.o.o. I have cooperated in 4 hotel investments over the past 15 years and I consider them to be by far the best provider for the design and implementation of signage and wayfinding.

In practice, investors and hoteliers are insufficiently aware of the importance of quality signage and management of guest flows in buildings and hotels.

The company Oznaka d.o.o., with its expertise and experience, can address the issue of hospitality signage already in the design phase and solve this important issue for investors and hoteliers even before the first guests start to get lost in the corridors and lobbies.

The company Oznaka d.o.o. fully adapts its markings to the requirements of the brand or the overall graphic image of the client.

According to my experience, the company Oznaka d.o.o. always carried out the implementation within the agreed deadlines and price frames, so I highly recommend cooperation with them!
